iCACGP - International Commission on
Atmospheric Chemistry and Global Pollution
IGAC - International Global Atmospheric
Chemistry project

The **international Commission on Atmospheric Chemistry and Global Pollution (iCACGP)** and the **International Global Atmospheric Chemistry (IGAC)** project are pleased to announce that the joint **13th Quadrennial iCACGP Symposium/13th IGAC Science Conference will be held in Natal, Brazil in 2014!**

iCACGP and **IGAC** are delighted to be holding their joint conference for the **first time in South America**. This region of the world is of key importance in the earth system, has a growing community of atmospheric scientists and is the host of many integrated and inter- and transdisciplinary international research activities in atmospheric sciences over the past decades.

Many of the topics covered in the field of **Atmospheric Chemistry** are very relevant for Latin America and hosting such a large international conference here will stimulate the field and encourage students and young scientists to pursue academic careers.

The **IGAC&iCACGP OSC** will provide networking and 'leap-frogging' opportunities to enhance current capacities in the Latin American scientific community.

See you in Natal 2014!
